

Techcello Provides SaaS Lifecycle Management Solution to “SaaS-ify” Your Application Efficiently on the Powerful Microsoft Azure Cloud Platform

MICROSOFT AZURE ISV PROFILE: TECHCELLO

Founded in 2010, Techcello offers a .NET-based, multi-tenant software-as-a-service (SaaS) application development framework that provides independent software vendors and enterprises the non-functional components to build robust, secure, scalable, configurable, customizable, efficient, and economical applications on Microsoft Azure.

WHAT WE OFFER

SaaS Management

- Product licensing subscription management
- Recurring billing
- Multiple price plans
- Trial support
- Support for reseller model
- Billing dashboard
- Customer analytics
- Credit card/PayPal support
- Metering
- Invoicing
- Revenue tracking
- Customer portal
- Unique tenant identification

SaaS Engineering

- Tenant provisioning
- Tenant settings management
- Self-registration
- White labelling
- SaaS security implementation
- Single sign-on
- Data backup
- Product and tenant analytics
- Ad-hoc query builder
- Chart and report builder
- Business process customization
- Event-driven integration
- Business event audit streams
- Dynamic forms

SaaS Customization & Support

- Security audits
- Data sharding
- Custom fields
- Dynamic forms
- Business process workflows
- Notification
- Email templates
- Code templates
- Master data management
- Pick-up list
- Tenant hierarchy
- Multi-cloud support
- Exception and logs

WHAT OUR CUSTOMERS ARE SAYING

“Using Techcello’s multi-tenant SaaS application framework, we were able to quickly move to a cloud-based SaaS model within six weeks. The framework gave us all the engineering and operational components required for multi-tenant SaaS in a ready-to-use form.” – Andreas Defeld, Director of Development, Invision Software AG Germany

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted in Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
